Glosario

This document is incomplete. The external file associated with the glossary ‘acronym’ (which should be called `Main.acr`) hasn’t been created.

This has probably happened because there are no entries defined in this glossary. Did you forget to use `type=acronym` when you defined your entries? If you tried to load entries into this glossary with `\loadglsentries` did you remember to use `[acronym]` as the optional argument? If you did, check that the definitions in the file you loaded all had the type set to `\glsdefaultttype`.

This message will be removed once the problem has been fixed.
